

Facial Reflexology

Student: Marie Henry

Case Study	#2 Facial Reflexology. Therapist: Marie Henry, 15813 Singapor Lane TX77040, Houston, USA. Phone: 001 7138161980. Mail: mhenry20@comcast.net Treatment from july 08 to Oct 08
Name	Bernie Rogers. Nationality: USA
Gender	Male
Age	76
Occupation	Massage Therapist/Architect
Symptoms	Gout in big toe
Notes:	Bernie is a 76 year old man who is in excellent physical condition. Up until about 6 months ago he was running regularly and still training for half marathons. He began having problems with gout in his big toe on his right foot and was no longer able to run. He also at one time chipped the bone on the side of his big toe and the chip is still there. It does cause him a little discomfort. He does have some psoriasis on his face and head. Initially he modified his diet to one that is alkaline and cut back on his alcohol consumption to help the gout. He has currently resumed his old diet, which is vegetarian and resumed drinking alcoholic beverages. His gout has not returned.
