Name	Angela Rendon
Gender	Female
Age	77
Occupation	Housewife
Symptoms	<p>Partial loss of taste and smell from a cold virus 5 years ago Bone density loss Cataract Surgery 5 months ago- swelling around eyes</p>
Notes:	<p>Angela lost most of her sense of taste and smell (much to our dismay as her cooking changed) after a cold about 5 years ago. She has taken a number of nutritional supplements in hope that they would help. The change was not significant. She has had some bone loss and takes medication for it. About 5 months ago she had cataract surgery, first one eye and a month later the other. Before I began treating her she a lot of swelling around her yes. After each treatment the swelling was reduced. I also taught her some eye exercises to use and she did them almost every day.</p>
Treatment Plan	<p>Largest deposit – stomach Seven steps of basic Facial Reflexology- in every session. NP and Plexus balancing – stomach Nerve Points – Tongue 8 & 312 Nerve Points – Nose 3 & 555 Yamamoto – Eyes, Nose & Mouth Point under corner of eyebrow – circulate 30 sec to tone muscles and skin of eye area</p>
